20/10 VISION: being able to see clearly 20 feet ahead what the average eye can only see at 10\*

*\*20/10 Vision is an exhibition of painting, drawing and sculpture that uses sport as a catalyst for exploring current issues and the state of mind of our time.*

20/10 Vision is an exhibition of painting, drawing and sculpture that uses sport as a catalyst for exploring current issues and the general state of mind of our time. The current path we are on is a slippery slope that holds many potentially dangerous implications for our future, such as the degradation of our environment and global warming, loss and homogenization of cultures, the continued threat of economic collapse, and a general feeling of malaise and helplessness.

Through this doom and gloom scenario, I wanted to interweave a sense of the resilience of human beings; of our sense of humour, instinct, and intellect which has always carried us through difficult times. I believe we are in a tremendously exciting time of reflection with the potential to shift from ideals of progress at all cost to a more sustainable and fulfilling way of being.

As well as examining these universal themes, the works are also a reflection on thoughts and situations that have affected me on a more personal level over the past several years.

The last place finisher will be the one whose vision has been clouded over and who cannot see clearly where they have come from or where they are headed.

The first place finisher will be one who uses 20/10 Vision: the ability to see clearly 20 feet ahead what the average eye can only see at 10.
